

Please reject the NAB's petition 04-160. The Satellite Radio system should be able to provide it's subscribers the same context of information for weather and traffic conditions as the standard broadcasters do now. I pay for this service and the NAB should not be able to dictate what I am able to subscribe to. The ability to access these services via Satellite Radio systems only stimulates competition which is healthy for all who wish to compete for the fees I pay to subscribe. Thank you, James Walsh Jr.
